

BARON faux marble towel warmer radiator

The Baron towel warmer is made with a 1-1/4" - 3cm thick panel in Olycal stone quarried in the Pyrenées mountains mounted on a powder coated metal frame to allow wall installation. The Olycal stone and the large surface of the CINIER radiators allow the heat output generated by the radiator to radiate in an homogeneous pattern and to remain at a reasonable temperature of 150°F/65°C maximum for a higher comfort and safety level.

These unique characteristics make the CINIER radiator the most comfortable heating solution available to date. All electrical components used to make the electric version of the CINIER radiator are UL listed. The radiator can be supplied with a remote control.

The Olycal stone radiator weighs 122 lbs-55kg in the 51" tall version and 200 lbs /90kg in the 78-3/4" tall version. Overall thickness: 3" to 3-1/4" – 7.5/8cm. Height 51" to 79" - 130cm to 200cm. Width: 19-3/4" to 24" / 50cm to 60cm. 1 towel bar by Dornbracht, can be provided with 2 towel bars or switched for 3 towel hooks. Electric version, 120V for the US and Canada with 650 W-2220 Btu output in the 51"x 20" version. Hydronic version with coil in solid copper embedded in the Olycal stone.

Thermostat for hydronic version:
Oventrop Thermostat mounted in the back of the radiator , see Install instructions
Thermostat for electric version options:
1 /Thermostat mounted in the back of the radiator – right of left upon request.
2/ Thermostat wall mounted.
Please refer to product tech. sheet.

Baron Towel Warmer
51 & 61"/130 & 155cm tall
19-5/8 & 21-5/8"/50 & 55cm wide.
Energy output: 130cm: Elect 650W-2220Btu /Hydr 580 W-1980Btu – 155cm: 750W-2561Btu /Hydr 669 W-2285Btu
5 years manufacturer's warranty. Made in France by Ateliers Cinier.
