

BARON Radiator

The CINIER Baron radiator is made with a 1-1/4"- 3cm thick panel in Olycal stone quarried in the Pyrenées

mountains) mounted on powder coated metal frame to allow wall installation. The Olycal stone and the large surface of the CINIER radiators allow the heat output generated by the radiator to radiate in an homogeneous pattern and to remain at a reasonable temperature of 150°F/65°C maximum for a higher comfort and safety level. These unique characteristics allow the CINIER radiator the most comfortable heating solution available to date. All electrical components used to make the electric version
