

FLOWER WATER towel warmer radiator

The CINIER flower water radiator is made with a 1-1/4" - 3cm thick panel in Olycal stone quarried in the Pyrenées mountains mounted on powder coated metal frame to allow wall installation. The Olycal stone and the large surface of the CINIER radiators allow the heat output generated by the radiator to radiate in an homogeneous pattern and to remain at a reasonable temperature of 150°F/65°C maximum for a higher comfort and safety level. These unique characteristics allow the CINIER radiator the most comfortable heating solution available to date. All electrical components used to make the electric version of the CINIER radiator are UL listed. The radiator is supplied with a remote control.

The Olycal stone radiator weighs 162 lbs-73 kg in the 72-3/4" tall version and 243 lbs-110kg in the 78-3/4" tall version.
