ORIENTAL towel warmer/radiator

The CINIER Oriental radiator is made with a 1-1/4"- 3cm thick panel in Olycal stone quarried in the Pyrenées mountains mounted on a powder coated metal frame to allow wall installation. The Olycal stone and the large surface of the CINIER radiators allow the heat output generated by the radiator to radiate in an homogeneous pattern and to remain at a temperature of 95°-113°F/35 to 45°C in normal operation for a higher comfort and safety level with a maximum of 149°C/65°F.

These unique characteristics allow the CINIER radiator to be the most comfortable heating solution available to date. All electrical components used to make the electric version of the CINIER radiator are UL listed. The radiator can be supplied with a thermostat.

The Oriental radiator weighs 158 lbs-71kg in the 72" tall version and 168 lbs-75kg in the 86-1/2" tall version. Projection: towel bar 3" and towel warmer radiator 3" from finish wall. Product supplied with 2 towel hooks by Dornbracht, can be changed for towel bars and towel hooks. Customer can also provide his own towel bars, in such case they are installed at the time of fabrication.
Electric version, 120V for the US and Canada with 800 W-2732 Btu output in the 72"x 18" version.
Hydronic version with copper coil embedded in the Olycal stone, 803 W-2742 Btu output in the 72"x 18" version.

Oriental Towel Warmer dimensions available:
72" x 18" / 182cm tall 46cm wide
86-1/2" x 20" / 220cm x 50cm.
Heat output:
Elect 800W-2732Btu /Hydr 803W-2742Btu
Refer to chart of colors for other colors available.
5 years manufacturer's warranty.

Made in France by Ateliers Cinier.

Thermostat for electric version:
Honeywell thermostat wall mounted, sold separately
Please refer to Honeywell product sheet available upon request.

Thermostat for hydronic version:
Oventrop thermostat mounted on the back of the radiator – right of left upon request.
